

Copper Rock Healthcare

Copper Rock Healthcare was excited to welcome U.S. Congressman Eric Burlison and State Senator Curtis Trent to our facility for a tour and visit with our residents. We discussed the challenges that long term care faces with overburdening regulations and funding and our desire as a not-for-profit organization to provide excellent care and services to the residents during these very difficult times. We discussed our challenges to recruit, pay, and retain nursing staff in this highly competitive market and our high dependence on Medicaid as the payer for our residents. We also discussed how our Medicaid reimbursement rate is seriously underfunded. They both were great gentlemen, and it shows how much they care for our seniors and that they have not forgotten them. The residents and staff were all excited to have them visiting us and their caring hearts really made a difference here at CRH.
